DETAILED ACTION

1. This action is responsive to communications: Amendment, filed on 10/8/02.

This action is final.

2. Claims 1-39 are pending in this application. Claims 1, 16, 27, 34 and 37 are independent claims. In the Amendment, filed on 10/8/02, claims 24, 34 and 37 were amended.

3. The present title of the invention is "View Dependent Tiled Textures" as filed originally.

Claim Rejections - 35 USC § 112

4. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

5. Claims 1-36, 38 and 39 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

Claim 1 recites the limitation "image texture rendered simultaneously on a display screen immediately adjacent each other" in texture mapping. There is insufficient disclosure in the specification leading to the claimed limitation.

Art Unit: 2672

Claim 16 recites the limitation "rendering the texture map tiles simultaneously at the adjacent regions on the computer display screen" in applying a texture map. There is insufficient disclosure in the specification leading to the claimed limitation.

Claim 27 recites the limitation "selected viewing angles of plural adjacent tiles to be viewed simultaneously" in generating a tile data structure. There is insufficient disclosure in the specification leading to the claimed limitation.

Claim 34 recites "software instructions for simultaneously rendering the texture map tiles corresponding to the viewing angles" in a computer program. There is insufficient disclosure in the specification leading to the claimed limitation.

6. Claims 2-15, 17-26, 28-33, 35, 36, 38 and 39 are similarly rejected since they are dependent on the rejected independent claims

Response to Amendment

7. The arguments filed on 10/8/02 of amendment regarding claims 1, 16, 27 and 34 are not persuasive.

The applicant argues "Figure 4 shows plural "view-dependent sprited tiles 404AA-404DF" that are rendered together (i.e., simultaneously) on display screen 402". This is not persuasive to overcome 35 U.S.C. 112, first paragraph rejection because the applicant uses Figure 4 to argue the tiles are rendered together. However, there is not mentioning in the specification that the tiles are rendered together. In addition,

Art Unit: 2672

"rendered together" is not the same as "rendered simultaneously", for "simultaneous" has more stringent time requirement than "together".

Allowable Subject Matter

8. Claim 37 is allowed.

Conclusion

9. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
